

MAN

L21/31DF-M

GenSet

The MAN methanol-fuelled engine is a compact and reliable power source designed to run on methanol, heavy fuel oil (HFO), and most biofuels.

With its outstanding load-step capabilities and extremely long time between overhauls (TBO), this engine is ideal for many different applications.

Benefits at a glance

- Can operate on methanol and biofuels
- Long time between overhauls
- No unscheduled maintenance and repair work
- Low fuel and lube oil consumption while fulfilling legal emission limits
- Short installation length
- State-of-the-art SaCoS automatic controller

* Based on nominal generator efficiencies of 95 %

Last updated November 2023

General

- Engine cycle: four-stroke
- No. of cylinders: 5, 6, 7, 8, 9
- Bore: 210 mm – Stroke: 310 mm
- Swept volume per cyl: 10.74 dm³

Fuel consumption at 85 % MCR

- SFOC: 183 g/kWh at 85% load
- SFOC for part-load-optimized version: 180 g/kWh at 75% load

Cylinder output (MCR)

- At 900/1000 rpm
220 kW/cyl for 6-9 cylinders
(200 kW/cyl for 5 cylinders)
- Power-to-weight ratio:
18.4 – 22.5 kg/kW

Compliance with emission regulations

- IMO Tier II
- IMO Tier III (with MAN SCR)

Main features

Turbocharging system

- High efficiency constant pressure MAN TCR series exhaust turbocharging system jet assist for improved load response and start up time

Engine automation and control

- MAN in-house developed engine attached safety and control system MAN SaCoS

Fuel system

- Conventional main injection system
- Methanol Port Injection acc to IGF code
- Fuel injection system adjusted for lowest fuel consumption while meeting IMO Tier II emission limits

Cooling system

- 1-string high and low temperature cooling water systems

Starting system

- Pressurized air starter (turbine type)

Engine mounting

- Common base frame for engine and alternator with integrated lube oil service tank and resilient mounting

Engine design

- “Pipeless engine” design
- Cooling water/lube oil pumps, thermostatic valves integrated in the front-end box

Optional equipment

- 100 % PTO on front-end with build-in bearing enable fire-fighting equipment (Fi-Fi)

MCR = Maximum continuous rating
SCR = Selective catalytic reduction
SFOC = Specific fuel oil consumption
